The Architect outlined the proposed plans for the site and questions were asked in relation to the access to the site and the safety of other road users. Questions were also asked about the ownership of the access as the access from the road includes access to another land owners field.

Questions were asked about flooding risk and ground water run off; the Architect stated they could look at having a pond or such like.

A percolating test had been conducted, however, there is further work that needs to be carried out. The Architect stated that this will be completed.

All other questions were answered.

RESOLUTION: Councillors resolved by a majority vote to recommend **APPROVAL** of the application subject to the following

- Further consideration is given to access onto the road which is a 60 mile an hour speed limit. Currently vehicles entering or exiting the site are not able to do so when turning into or traversing from the left of the site without multiple manoeuvres which have the capacity to block the road.
- It is noted that all other dwelling entrances along the same road have a splayed entrance to allow for good visibility.
- That due diligence is performed on the access rights to the land from the road.
